

Claims

What is claimed is:

- 5 1. A universal carrying device, comprising:
- a first substantially rectangular cover;
- a substantially rectangular carrier having an opening wherein the
- substantially rectangular carrier has a hinge line; and
- 10 a hinge attaching the first substantially rectangular cover to the first
- substantially rectangular carrier.
2. The device of claim 1, wherein the hinge is a living hinge.
- 15 3. The device of claim 1, further including a carrier adapter that
- engages the opening.
4. The device of claim 1, wherein the hinge line extends across the
- opening.
- 20 5. The device of claim 3, wherein the opening has a narrow end
- and a fat end, the fat end is near the hinge.
6. The device of claim 1, wherein the first substantially rectangular
- 25 cover snap fits with the substantially rectangular carrier.
7. The device of claim 1, further including a lip along a portion of
- the substantially rectangular cover.

- 15 -

8. A universal carrying device, comprising:

a first substantially planar cover;

a second substantially planar cover having an opening; and

5 a hinge attaching the first substantially planar cover and the second substantially planar cover wherein the first substantially planar cover snap fits with the second substantially planar cover.

10 9. The device of claim 8, wherein the second substantially planar cover has a hinge line.

10. The device of claim 8, wherein the first substantially planar cover has a lip.

15 11. The device of claim 8, further including a carrier adapter that engages the opening.

12. The device of claim 8, wherein the opening has a wide end and a narrow end.

20 13. The device of claim 10, wherein the first substantially planar cover has a flange along a portion of the lip.

25 14. The device of claim 8, wherein the hinge is a living hinge.

- 16 -

15. A universal carrying device, comprising:

a first substantially planar cover having a lip along a portion of a
periphery of the first substantially planar cover;
5 a second substantially planar cover having an opening; and
a living hinge attaching the first substantially planar cover and the
second substantially planar cover.

10 16. The device of claim 15, further including a second living hinge in
the second substantially planar cover.

17. The device of claim 15, wherein the first substantially planar
cover snap fits into the second substantially planar cover.

15 18. The device of claim 15, wherein the first substantially planar
cover has a printing surface.

20 19. The device of claim 15, wherein the first substantially planar
cover has a cut out.

20. The device of claim 15, further including a carrier adapter that
engages the opening.
